AdBlue® Delivery Checklist

In order for us to deliver your order of AdBlue without any problems, please ensure all the following requirements are met.

Access

IBC's are usually delivered on a large articulated vehicle, so easy access to your premises is essential.

Booking-In

If your deliveries need to be booked in let us know in advance.

Forklift Truck

1000 Litre IBC deliveries will require a Forklift truck to unload easily from the vehicle. We are happy to deliver to a nearby business if they have one you can borrow, just let us know (and them) in advance.

Deposits

We waive the £100 IBC deposit to our customers as we want you to re-order with us. When the container is empty, we'll exchange it for another full container. If you only require one container we'll need to collect this from you within 12 months of delivery for no extra charge.

All bungs/caps need to be correctly fitted and tightened. Our IBCs are sealed to retain security of Adblue® quality in a closed loop system, therefore IBCs must be returned with all their tag seals intact.

If these are broken or damaged we reserve the right to invoice you for £100.

IBC Taps and Pumps

There is a basic tap fitted to AdBlue® IBC containers, however we recommend purchasing a pump from our range to make dispensing the AdBlue® from the IBC as easy as possible.
